

## Health, Safety, Environment & Community Superintendent

**The Dargues Gold Mine is located near Majors Creek in NSW's, approximately 60km south east of Canberra. The mine is essentially a greenfield site, with only some of the surface earthworks being completed to date. Development of the mine is scheduled to commence by mid-2017, with production shortly after.**

- **Greenfield site**
- **Location - Majors Creek / Braidwood NSW, approximately 60km south east of Canberra**
- **Residential**

This is a residential position and presents an excellent opportunity for the right person to become part of the local community, while developing an outstanding environmental, and health and safety management system.

Exceptional communication and consultation skills are essential for you to be successful in this role, as you will be interacting with a diverse cross section of the local community, government regulators, and both junior and senior company staff. Demonstrated experience with community relations will be highly regarded.

Experience with the development and implementation of environmental management plans, along with demonstrated achievement of environmental objectives and goals in a mining operation will be required.

Your key work areas will be:

- **Community engagement** – you will be working closely with the local community, business owners and environmental groups to build a good working relationship that allows for the communication of ideas, issues and information.
- **Environmental Compliance and Management** – the mine operates in strict compliance with its Part 3A approval, EPBC Act approval, Environment Protection Licence and other relevant commitments. Your role will see you liaising with government agencies to ensure that the mine remains compliant.
- **Safety Management** – ensure the mine operates in accordance with relevant health and safety legislation and the site safety management plan. You will be required to implement strategies and programs that deliver the right

safety outcomes and behaviours.

Our ideal candidate will possess the following:

- Degree qualified in Environmental Science or Occupational Health and Safety.
- Strong verbal and written communication skills.
- High level of skill with Microsoft Office, INVIRON, INCONTROL and CAD software.
- Proven ability to prepare detailed regulatory reports.
- Excellent understanding and experience with relevant government legislation.
- A self-starter who can work independently to achieve the required outcomes.
- An excellent ability to work collaboratively with other mining teams.

To apply please follow the links.

**APPLICATIONS WILL CLOSE 31ST AUGUST 2016**

NOTE: We do not accept applications from recruitment agencies.
